

Enterprise Control. Cloud Agility.

Now you can get the power of enterprise storage without the cost and complexity of owning and managing storage infrastructure.

Get Zadara — on your premises or with your chosen cloud provider — and you get more than industry-leading enterprise storage. You get a fully-managed, pay-only-for-what-you-use service that eliminates your risk: technology risk, operational risk, and financial risk.

Eliminate Technical, Operational, and Financial Risk

Zadara eliminates the risks associated with enterprise storage by delivering industry-leading enterprise SAN, NAS and Object storage as a fully-managed service with 24/7 proactive monitoring and support, backed by a 100%-uptime guarantee, and wrapped in the industry's only true consumption-based model. Scale up and down as needed and pay only for what you actually use.

Scalable Enterprise Data Services Where Needed

Zadara delivers fully managed enterprise solutions deployed as private, hybrid, or public cloud infrastructure. You choose how you want your Zadara solutions hosted: on-premises, colocated in a data center, or in the cloud.

Consolidate Traditional and Next-Generation IT Environments

With Zadara you can meet your present and future IT requirements. Block and file storage support client-server databases, applications, and physical and virtualized hosts. Object storage

supports containerized, cloud-native, and serverless applications running in the cloud and edge.

Total Control and Security

Configure your Zadara cloud storage performance and capacity on demand, and change storage configurations and services as desired. You choose controller CPU, memory, cache, plus storage type: NVMe, SSD, and HDD options are available. Encryption in-flight and at-rest (AES-256) ensures your data is totally protected; and only you have the encryption keys.

“With the combination of AWS and Zadara Storage, we’re getting better performance than what we had from an on-premises solution using an EMC SAN, and saving at least 50% of our data center costs.”

Craig Loop, director of technology, Realty Data/Westcor

Public Cloud Partners

IT Transformation

Combine the composable infrastructure of Zadara cloud storage with public cloud compute and networking to modernize IT.

Business Continuity/High-Availability

Benefit from a 100%-uptime guarantee, backed by Zadara multi-cloud, multi-zone high availability. Enable automated back-up and archiving with rapid recovery using Zadara object cloud storage on premises or in the cloud.

Security, Privacy, Compliance

Total privacy with dedicated resources and media, and end-to-end encryption using customer keys. Support SOC 2, ISO 27001, GDPR, and HIPAA compliance with standards certifications.

Cloud Migration

Use Zadara to integrate private, hybrid, and public clouds. Move block, file, and object data across local, regional, and global locations.

Big Data, Fast Data Analytics

Zadara combines rich data services and cloud scalability. Support big data capacity needs with Zadara file and object cloud volumes. Deliver performance for fast data with Zadara block and file cloud volumes.

Containerization, Virtualization

Run containers directly on Zadara cloud storage using the embedded Docker platform. Optimize virtual machines with VMware-certified Zadara enterprise cloud storage.

Transform your business with zero-risk enterprise storage.

Zadara transforms storage-related costs from a variable mix of equipment and management expenses to a predictable, on-demand, pay-per-use, elastic service that greatly simplifies planning, streamlines budgeting, and improves return on investment (ROI). Find out how Zadara can help you transform your business. Call or email today.
