

# Zadara Cubes on AWS

Now you can get all the performance of an enterprise-class storage system, fully integrated with your AWS environment and account.

**The power of enterprise storage. The convenience of Amazon Web Services.**

Zadara provides the advanced features you have come to expect from enterprise storage, in a fully-managed cloud model. To make it even easier to use Zadara we now offer pre-configured solutions (we call them “Cubes”) that you can purchase directly through AWS Marketplace and use right within your AWS environment.

**Cloud-based NAS, SAN on AWS. Active Directory integration.**

The Zadara Cube on AWS is a cloud-based Enterprise NAS appliance with an NFS/CIFS server, dual HA controllers, dedicated high performance drives and enterprise-class storage features (snapshots, replication, thin provisioning, encryption, etc.) with Active Directory integration.

**AWS DirectConnect. Isolated infrastructure.**

Zadara is located in data centers adjacent to AWS and connected via AWS DirectConnect. You get physical drives that are completely isolated from the EBS infrastructure. The Amazon Elastic Compute Cloud (EC2) machine is used only for provisioning the Cube.

**High-Availability. Backup to S3.**

You can automatically back up your Zadara Cube to Amazon Simple Storage Service (S3) storage. You can also migrate data from Amazon S3 to Amazon Glacier cold storage, creating new tiers of data protection.

**Consolidated billing and management.**

Because Zadara Cubes are integrated with AWS you don't need to waste time setting up and managing multiple accounts with separate billing. Easily track your account's charges in your AWS account and receive only one consolidated bill.

## Features & Benefits

### Pre-configured

Multiple pre-configured capacities available

### AWS Integrated

Cubes are billed directly through your AWS account

### Enterprise

NFS, CIFS (AD), snapshots, high availability, and more

### Metered

Performance charts.  
Charged by the hour.

“With the combination of AWS and Zadara Storage, we’re getting better performance than what we had from an on-premises solution, and saving at least 50% of our data center costs.”

Craig Loop,  
Director of Technology,  
Realty Data / Westcor

### Zadara extends and enhances your AWS environment.

Zadara offers features and functions to enhance what you get from AWS directly. And with AWS DirectConnect, your Zadara Cubes appear to be right inside your AWS environment. See the chart below for a summary of the features you get with Zadara.

		AWS (EFS, EBS, PIOPS)	Zadara
NAS & SAN	Universal File Protocol	NFS Only	NFS + SMB
	Active Directory ACLs	X	✓
	Large File Volumes	PBs	200 TB
	Large Block Volumes	16 TB	200 TB
Privacy	Encryption of Data-at-Rest	✓	✓
	Encryption Key w/ Customer	S3 / EBS Only	✓
	Dedicated, On-Demand HW	X	✓
Perform.	High IOPS per Volume	20K (PIOPS)	150,000
	SSD/HDD Selection	EBS Only	✓
	Embedded Containers	X	✓
Location	On-Premises / Hybrid Cloud	X	✓
	Multi-Cloud Access	X	✓
HA/DR	Clusters/Sharing	X	✓
	Instant Snapshots & Clones	X	✓
	Remote Replication	X	✓
	Availability SLA	99.95%	100%

### Transform your business, with zero-risk enterprise storage

Zadara eliminates the technical, operational, and financial risks associated with enterprise storage, by delivering industry-leading enterprise SAN, NAS and Object storage as a fully-managed service with 24/7 proactive monitoring and support, backed by a 100%-uptime guarantee, and wrapped in a pay-only-for-what-you-use model. Find out how zero-risk enterprise storage can help transform your business. Call or email today.
