

# Cloud Hydration

Cloud Hydration enables businesses to migrate corporate data to the cloud through a cost-effective, practical process

A simple and cost-effective data migration service.

Zadara’s Cloud Hydration enables you to adopt cloud computing using a cost-effective and practical way of moving corporate data into the cloud. Cloud Hydration can be targeted to any cloud storage platform from any vendor, including Zadara, Amazon S3/EBS/EFS/Glacier, Google Cloud Platform, Microsoft Azure, or any other storage target.

## Features & Benefits

### Easy Process

Offline or online data can be migrated in just a few steps

### Any Target

Migrate to Zadara or any cloud storage platform

### Cost-Effective

Cost per project is based on data type, capacity, and other factors

### Online Data

Zadara can migrate online data with no data loss and little or no downtime

For environments where your data does not need to be continuously online, the Cloud Hydration process involves simply copying the data to an appliance supplied by Zadara, shipping it to the cloud vendor, and copying the data to the target. In cases where there can be limited or no downtime, the process is almost as simple but requires a mirrored appliance and resynchronization of your data once it is uploaded to the cloud environment.

### Eliminate technical, operational, and financial risk.

Zadara eliminates the technical, operational, and financial risks associated with enterprise storage, by delivering industry-leading enterprise SAN, NAS and Object storage as a fully-managed service with 24/7 proactive monitoring and support, backed by a 100%-uptime guarantee, and wrapped in a pay-only-for-what-you-use model.

### Transform your business with zero-risk enterprise storage.

Zadara transforms storage-related costs from a variable mix of equipment and management expenses to a predictable, on-demand, pay-per-use, elastic service that greatly simplifies planning, streamlines budgeting, and improves return on investment (ROI). Find out how zero-risk enterprise storage can help transform your business. Call or email today.
