

VSS Snapshots

Create non-disruptive snapshots of your Microsoft enterprise applications running in public and private clouds, and replicate them worldwide for business continuity and disaster recovery

Simplify your Microsoft enterprise applicaiton backup process.

Using VSS for Zadara, for the first time, public cloud customers can take online, snapshot-based backups of their Microsoft applications instead of implementing complicated workflows or stopping their mission critical applications to create backup copies.

Features & Benefits

100% Private

Dedicated resources.
Secure encryption.

Configurable

Drive and RAID selection.
Server clustering capable.

MS Integrated

Application quiescing.
Low-impact Snapshots.

Metered

Performance charts.
Charged by the hour.

Microsoft Volume Shadow Copy Service (VSS) enables online, point-in-time backups of Microsoft SQL Server, Exchange, SharePoint and other enterprise applications. And Zadara customers can replicate these snapshots to any of Zadara’s dozens of public storage clouds around the world including AWS, Azure, Google Cloud Platform and others.

Eliminate technical, operational, and financial risk.

Zadara eliminates the technical, operational, and financial risks associated with enterprise storage, by delivering industry-leading enterprise SAN, NAS and Object storage as a fully-managed service with 24/7 proactive monitoring and support, backed by a 100%-uptime guarantee, and wrapped in a pay-only-for-what-you-use model.

Transform your business with zero-risk enterprise storage.

Zadara transforms storage-related costs from a variable mix of equipment and management expenses to a predictable, on-demand, pay-per-use, elastic service that greatly simplifies planning, streamlines budgeting, and improves return on investment (ROI). Find out how zero-risk enterprise storage can help transform your business. Call or email today.
