

100%-OPEX, MULTI-TIER BACKUP FOR VEEAM

The only unified, multi-tier, 100%-OpEx data protection solution for Veeam 3-2-1 backup and recovery of your business-critical data.

Protecting data in today's hybrid IT environments presents challenges legacy backup systems simply weren't designed to handle. That's why Zadara and Veeam teamed up to offer the only 100%-OpEx, unified, multi-tier data protection solution that delivers complete 3-2-1 backup protection without the need for multiple technologies. Protect your data from ever-present threats, including technology failures, natural disasters, and bad actors.

No matter where your data is generated or stored, Zadara + Veeam provide comprehensive protection without undue cost or complexity. Use Zadara + Veeam for any backup requirement or workload, including:

- Microsoft Office 365, Sharepoint, Exchange OneDrive backup
- NAS backup
- Ransomware protection
- VMware backup
- Hybrid cloud and multi-cloud (including on premises)

KEY BENEFITS OF ZADARA

SIMPLE

- Multi-tenancy capability that allows you to create multiple backup workflows within a single infrastructure without compromising security
- Veeam Ready Object and Repository for seamless operation

SECURE

- Protect your data from ransomware and user error with Object Lock data immutability and 'air gap' architecture
- Leverage copies of backup data securely using Veeam Datalabs

SCALABLE

- Optimize cost and performance with multiple tiers of storage
- Multi-cloud: deploy on premises and at service providers worldwide
- Scale-out architecture; start small and grow; pay only for what you use (no minimum commitments!)

PREDICTABLE

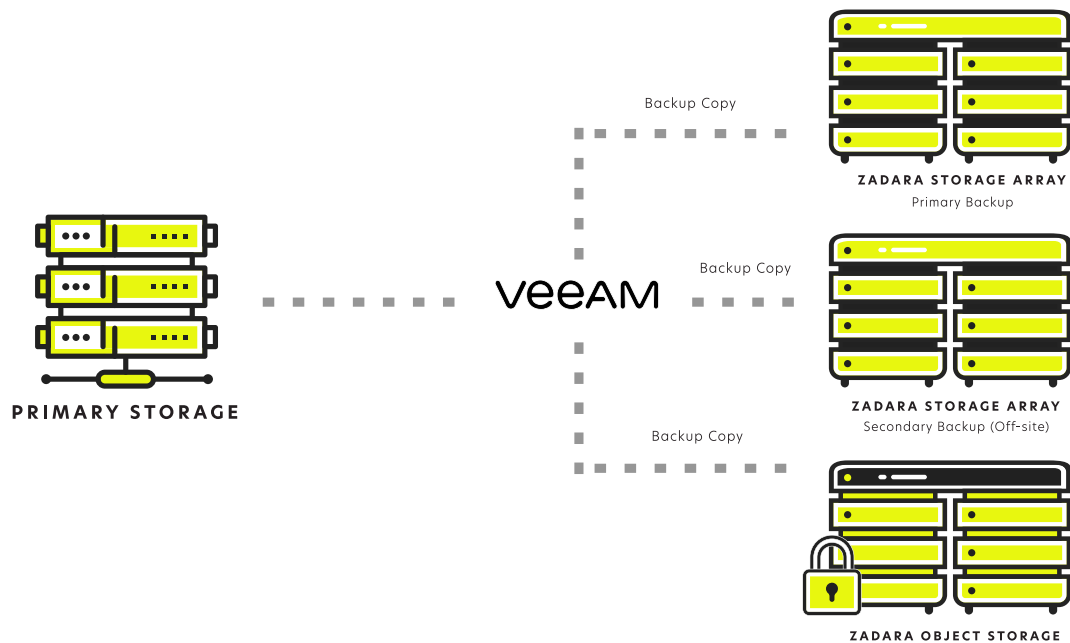

- Incremental backup of large data sets, allowing for improved Recovery Point Objectives (RPO) and Recovery Time Objectives (RTO)
- 100% SLA guarantee (or we pay you back!)

ZERO RISK

- No long-term contracts: no minimum commitments
- 24/7/365 expert support
- On-demand upgrades, with no CapEx costs

CONTROL

- No shared resources
- You have control where your data resides

REDUCE YOUR FINANCIAL AND OPERATIONAL RISK

Combining Veeam Backup & Recovery with Zadara's 100%-OpEx multi-tier storage allows you to simplify operations while improving performance and reducing the risks associated with managing complex storage. Zadara + Veeam offers the most cost-effective solution by eliminating the need for CapEx storage purchases, support contracts, and disruptive data migrations. Get the right storage hardware to meet your business requirements today, without waiting for a refresh cycle or paying extra for updates.

FLEXIBLE BACKUP: MULTIPLE TIERS, MULTIPLE LOCATIONS

Veeam Backup & Recovery works seamlessly with Zadara's 100%-OpEx storage to enable exceptional backup performance and rapid data recovery in a streamlined user experience and flexible operating model. With storage for every tier, Zadara is ideal for users who need the flexibility to create backup solutions to meet any objective. Keep backups on premises — including on-premises object store — while leveraging a true OpEx model. Alternatively, implement a multi-tier, multi-cloud backup strategy, with

Zadara + Veeam at every tier. This unparalleled flexibility enables you to stay in control of your data and your costs for both technical and commercial peace of mind.

SECURE: DATA IMMUTABILITY AND AIR GAP PROTECTION

Using Veeam Availability Suite V10 customers can take advantage of Zadara's full support for immutable object data placement. Immutable data options enable enterprises and service providers to meet increasingly stringent data governance and compliance requirements and enhance their data protection practices against growing risks, such as ransomware.

- A single storage platform for multiple tiers of storage to optimize for performance or capacity
- Dedicated resources, not shared
- Policy-driven data immutability protection support for Veeam Availability Suite V10
- 'Air gap' protection with isolated drives, vCPUs, and networking

SCALE-OUT BACKUP REPOSITORY WITH AUTOMATED TIERING

Ensure data sovereignty and control in a multi-tier backup environment. Zadara is the only solution that allows you to define tiers to meet business-driven objectives, and redefine tiers and shift capacity as requirements change. To ensure efficiency, Veeam Cloud Tier automatically offloads current or older backup files from the primary backup repository to cost-effective Zadara Object Storage based upon user choices set within Veeam. This allows you to:

- Leverage the simplicity and elasticity of Zadara's object storage
- Store data in a cloud tier without any API call or egress fees
- Avoid the vendor lock-in associated with legacy storage and public clouds

HOST YOUR OWN OR CHOOSE A SERVICE PROVIDER

Want to host your own backup solution? You can deploy Zadara + Veeam storage on your premises, at your chosen co-location provider, or in a public-cloud adjacent data center. Or, if you're looking for a service provider to manage all or part of your backup infrastructure, Zadara storage with Veeam Backup & Recovery is available through leading service providers worldwide, including the Veeam Cloud Service Provider network.
