CLOUD MIGRATION

Cloud Migration enables businesses to migrate corporate data to the cloud through a cost-effective, practical process

A SIMPLE AND COST-EFFECTIVE DATA MIGRATION SERVICE.

Zadara's Cloud Migration enables you to adopt cloud computing using a cost-effective and practical way of moving corporate data into the cloud. Cloud Migration can be targeted to any cloud storage platform from any vendor, including Zadara, Amazon S3/EBS/EFS/Glacier, Google Cloud Platform, Microsoft Azure, or any other storage target.

For environments where your data does not need to be continuously online, the Cloud Migration process involves simply copying the data to an appliance supplied by Zadara, shipping it to the cloud vendor, and copying the data to the target. In cases where there can be limited or no downtime, the process is almost as simple but requires a mirrored appliance and resynchronization of your data once it is uploaded to the cloud environment.
