SNAPSHOTS

Accelerate backup operations and DevOps with highly efficient, automated, and policy-driven snapshots.

ADVANCED SNAPSHOTS PROVIDE POINT-IN-TIME DATA IMAGES FOR BACKUPS AND APPLICATION TESTING.

Zadara snapshots are read-only, point-in-time, volume images that only consume capacity when the underlying volumes are modified. Snapshots may be created manually or automatically, with creation and deletion policies. Zadara snapshots can be used as first-tier backups, to speed backups and eliminate backup windows for external media (e.g., tape, object storage, or remote backup targets), and to create reference data sets for analytics and testing.

Leveraging Zadara Remote Mirror and Clone operations, customers can replicate these snapshots throughout their Enterprise Data Cloud, on premises or to any of Zadara's dozens of public storage clouds around the world including AWS, Azure, Google Cloud Platform and others.

Zadara snapshots are fully integrated with Microsoft's Volume Snapshot Service (VSS). Leveraging the VSS provider, users can implement application-consistent, automated policy-driven, snapshot-based backups of applications like Microsoft SQL Server, Exchange, SharePoint and other enterprise applications.

FEATURES AND BENEFITS

EFFICIENT

Thin provisioned.
Only store changed data.

AUTOMATED

Policy-based creation
and deletion.

VSS SUPPORT

VSS application quiescing.
Application consistent
snapshots.

100% PRIVATE

Dedicated resources.
Secure encryption.

ELIMINATE TECHNICAL, OPERATIONAL, AND FINANCIAL RISK.

Zadara eliminates the technical, operational, and financial risks associated with enterprise storage, by delivering industry-leading enterprise SAN, NAS and Object storage as a fully-managed service with 24/7 proactive monitoring and support, backed by a 100%-uptime guarantee, and wrapped in a pay-only-for- what-you-use model.

TRANSFORM YOUR BUSINESS WITH ZERO-RISK ENTERPRISE STORAGE.

Zadara transforms storage-related costs from a variable mix of equipment and management expenses to a predictable, on-demand, pay-per-use, elastic service that greatly simplifies planning, streamlines budgeting, and improves return on investment (ROI).

Find out how zero-risk enterprise storage can help transform your business.
