

SECURE BUSINESS CRITICAL DATA AGAINST RANSOMWARE ATTACKS WITH ASIGRA'S VIRTUAL BACKUP APPLIANCE POWERED BY ZADARA

A simple-to-deploy and easy-to-manage backup & storage
"as a service" solution for Managed Service Providers and enterprises.

Asigra's Backup & Recovery software and Zadara's Storage-as-a-Service platform have joined forces to provide IT and backup admins the ability to effectively and efficiently safeguard business data leveraging powerful features and an intuitive console, in combination with a subscription-based pricing model to de-risk the traditional way of buying expensive storage hardware based on projected capacity.

The Asigra DS-System (backup engine) software is integrated seamlessly with Zadara Virtual Private Storage Arrays (VPSA), providing an enterprise grade backup solution across your data center—physical and virtual machines, drives, applications, SaaS services, and systems. The DS-System also offers off-site replication for additional redundancy and disaster recovery (DR) capabilities.

The Asigra Virtual Backup Appliance is integrated within the Zadara Storage VPSA technology which looks, performs and behaves like an Enterprise Storage Array—with NAS and SAN services, dual HA controllers, dedicated high performance drives and Enterprise class Data Protection features offered as a service on-premise, at your chosen co-location, or at public cloud providers (Amazon AWS, Microsoft Azure, Google Cloud Platform).

KEY BENEFITS OF ZADARA

BIDIRECTIONAL MALWARE DETECTION

All files are scanned in real-time on backup, isolating malicious code and alerting admins of infection

SEAMLESSLY INTEGRATED

Asigra Virtual Appliance backed by Zadara's VPSA

SECURE BY DESIGN

NIST FIPS 140-2 certified:
AES-256 Encryption
in-flight & at-rest

HIGH AVAILABILITY

99.999% uptime ensures data is always available and backed by a 100% SLA guarantee

MULTI- TENANT

Manage multiple customers in segregated environments on the same infrastructure

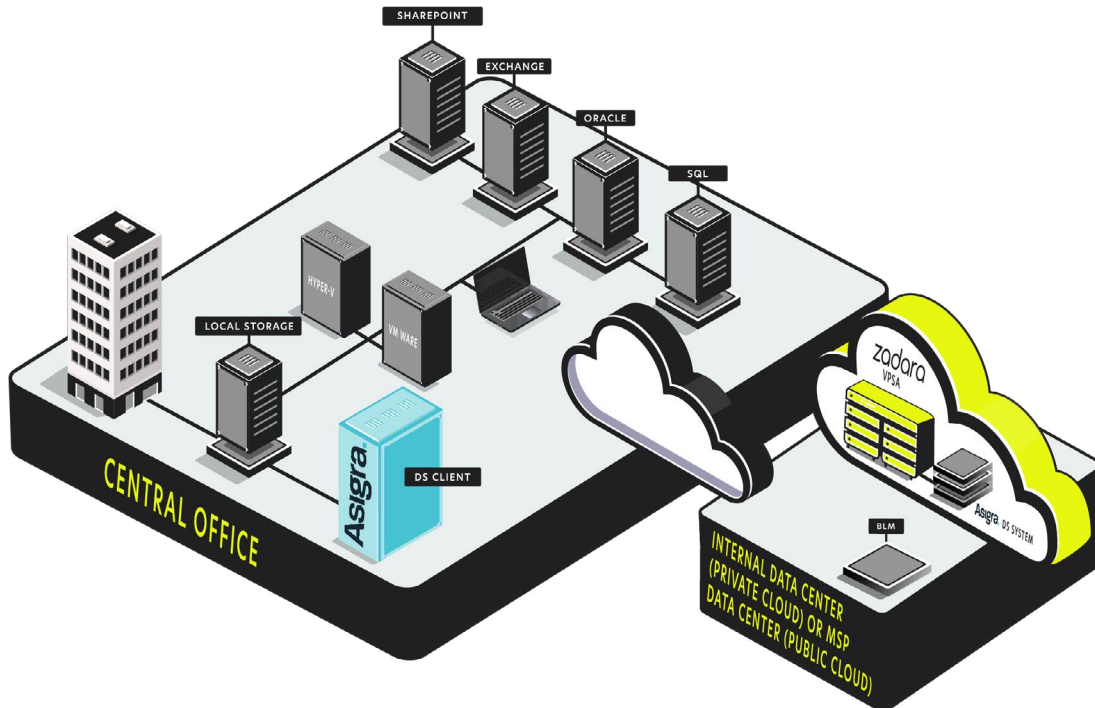

AVAILABLE ANYWHERE

Cloud agnostic: public, private, hybrid cloud deployment

100% OPEX PRICING

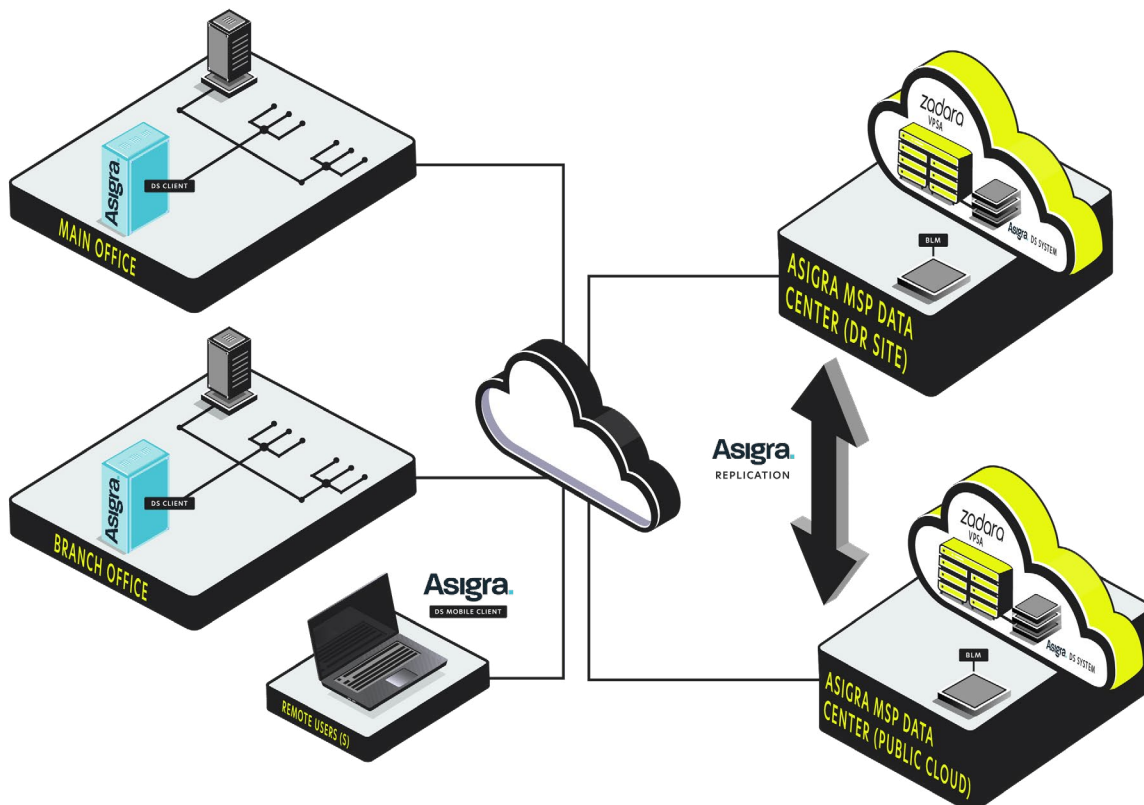

The only pure pay-as-you-go storage system with no minimum commitment or long-term contracts

SIMPLE BACKUP USING ZADARA & ASIGRA APPLIANCE

CLUSTERED HIGH AVAILABILITY SOLUTION USING ZADARA & ASIGRA

Asigra's Virtual Backup Appliance provides customers a full backup solution in a single box that provides backup and replication capabilities for both on-premise services and external agents.

ASIGRA CLOUD BACKUP AND RECOVERY SOFTWARE

Award-winning Asigra Cloud Backup™ is a single, comprehensive, multi-tenant data protection platform for all sources and types of corporate data including physical and virtual servers, enterprise databases and applications, endpoint devices, SaaS-based office systems like MS Office 365, G Suite, and Salesforce, as well as PaaS sources like AWS and Azure. Asigra is also the first backup solution to prevent ransomware from infecting backups that cause attack-loops.

ZADARA'S ENTERPRISE STORAGE-AS-A-SERVICE PLATFORM

Zadara's Storage-as-a-Service solution utilizes both flash and spinning disks to provide unified file, block and object storage, and is available in single or dual-controller configurations. Zadara combines the flexibility of unified storage, the performance of solid state flash drives, the capacity of hard disks, the simplified management of a powerful web-based user interface, along with white-glove 24/7/365 support backed by a 100% SLA guarantee. Zadara arrays support any data type, any protocol and can be provisioned anywhere—on-prem, hybrid and cloud. Zadara fits a wide range of applications from file and media storage to business continuity, video surveillance, and many more. Pay only for what you use with Zadara while providing the data integrity, reliability and ease-of-data management required by a world that never sleeps.

“The flexibility of this Zadara-based platform adapts to nearly any IT environment using the industry’s strongest data protection and cybersecurity technologies available, supporting partners and customers globally.”
