SIMPLIFY VEEAM NAS BACKUP WITH ZADARA

Create a fast, cost-effective NAS data backup & recovery solution using infinitely scalable, multi-tier 100%-OpEx storage with data immutability.

Network Attached Storage (NAS) provides a centralized location for users on a network to store, access, edit and share files. Documents, images, videos, and other business-critical files are all managed by the NAS, where users (and, potentially, hackers) can access them conveniently. IT managers need a unified backup and recovery solution that can efficiently protect the ever-growing amount of data stored via NAS protocols across far-flung enterprises. And in today's always-on environment an effective backup solution must provide fast backup and recovery times.

Combining Veeam and Zadara eliminates the complexity and inefficiency of traditional data protection and recovery solutions by creating a unified data protection and recovery solution — including backup, replication, disaster recovery, and multi-tier storage. Eliminate data silos and streamline data management, by converging all your backup infrastructure on a 100%-OpEx scale-out platform.

FLEXIBLE (AND POWERFUL) DATA STORAGE FOR VEEAM NAS BACKUP

Veeam Data Platform v12 simplifies the protection of file data and servers with powerful capabilities that bring flexibility to NAS protection and recovery, including Changed File Tracking functionality that enables fast incremental backups of NAS environments and immutability support for added protection from Ransomware.

Zadara's 100%-OpEx enterprise storage* allows you to take advantage of the full capabilities of Veeam NAS Backup and create a unified, multi-tier backup and recovery solution.

- Multi-tier backups in a single system: performance, capacity, cloud tiers
- Incremental backups for significantly faster backup and recovey performance
- Rapid restore capabilities for all NAS systems
- Offline copy using object storage for long-term retention

WHY ZADARA

SIMPLE

- A single storage platform for performance, capacity, cloud tiers
- Seamless operation with Veeam NAS backup

SCALABLE

- Scale up, down or out; pay only for what you use
- Optimize cost and performance with multiple tiers of storage
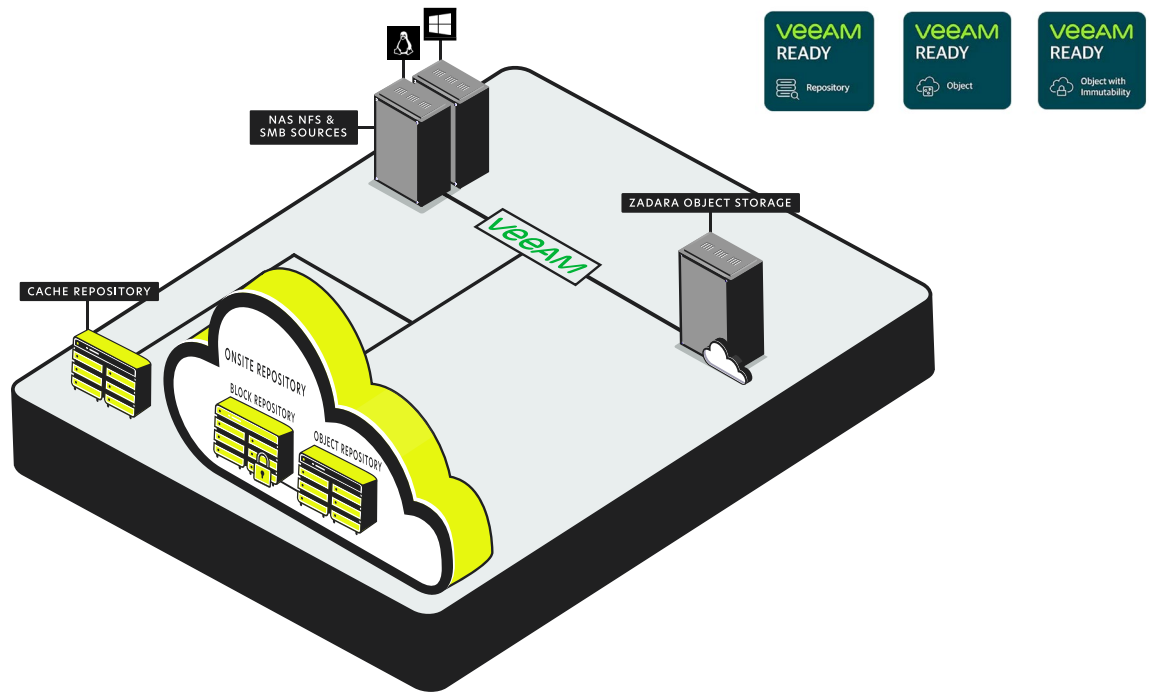

ZERO RISK

- No long-term contracts.
- On-demand 24/7 expert management and support

SECURE

- Object Lock data immutability with 'air gap' protection combined with Veeam Data Platform NAS backup

PREDICTABLE

- Zero storage refresh costs. No disruptive migrations.
- 100% SLA guarantee (or we pay you back)

USE VEEAM SCALE OUT BACKUP REPOSITORY OR DIRECT TO OBJECT CAPABILITIES

Zadara supports Veeam's Scale-out Backup Repository (SOBR) that allows you to consolidate and extend backup repositories, and select between higher performance and more efficient storage targets while also enabling data immutability by using Zadara Object Storage** directly.

Using Zadara with Veeam allows you to streamline storage operations for higher performance and greater efficiencies. Implement a 100%-OpEx on-premises backup solution, and use a Zadara Object Storage** repository from a Zadara Service Provider to provide an offsite copy or archive.

- **Scalability:** Scale each tier, independently, on-demand
- **Simplicity:** One storage system, every location, every tier
- **Flexibility:** Define tiers to meet business-driven objective
- **Agility:** Redefine tiers and shift capacity as requirements change

WHY SERVICE PROVIDERS WIN WITH ZADARA

Zadara is storage built for the demands of service providers. Built-in margins, with a 100%-OpEx model. Multi-tenant efficiency, with total resource isolation per tenant. Fully managed 24/7, so you can deploy your people to higher value tasks. Zadara storage systems can be installed anywhere — on your customer's premises, at your data center, and in third-party, public-cloud adjacent data centers worldwide — and managed centrally, to create a unified, 100%-OpEx data protection solution.
