

FLEXIBLE BACKUP & RECOVERY FOR MICROSOFT 365

Leverage a flexible Office 365 backup solution, delivering 100%-OpEx, multi-tier, multi-location, infinitely scalable enterprise-class storage with data immutability.

Veeam® Backup for Microsoft Office 365 helps ensure Office 365 data is always protected – from accidental deletion, security threats, retention policy gaps, ransomware, and more. Choosing the right storage solution for Office 365 backup is critical to ensuring comprehensive data protection of Office 365, Exchange, SharePoint, OneDrive for Business and Microsoft Teams data on premises and in the cloud. Combining Veeam Backup and Recovery with Veeam Backup for Microsoft Office 365 (VBO) and Zadara 100%-OpEx storage* enables unified backup and rapid recovery of Office 365 data, in a flexible operating model that scales with your needs.

* Zadara Block storage, File storage, and Object storage release 23.03

WHY ZADARA

SECURE

- Isolated resources, multi-tenant architecture
- Immutable S3 Object Storage
- Up to 14 9s of data durability

PREDICTABLE

- Meet RPO and RTO objectives with multiple storage locations, tiers
- Multiple recovery location options: on premises, email, Microsoft 365

ZERO RISK

- No long-term contracts
- 24/7/365 expert support
- On-demand upgrades, with no CapEx costs

SIMPLE

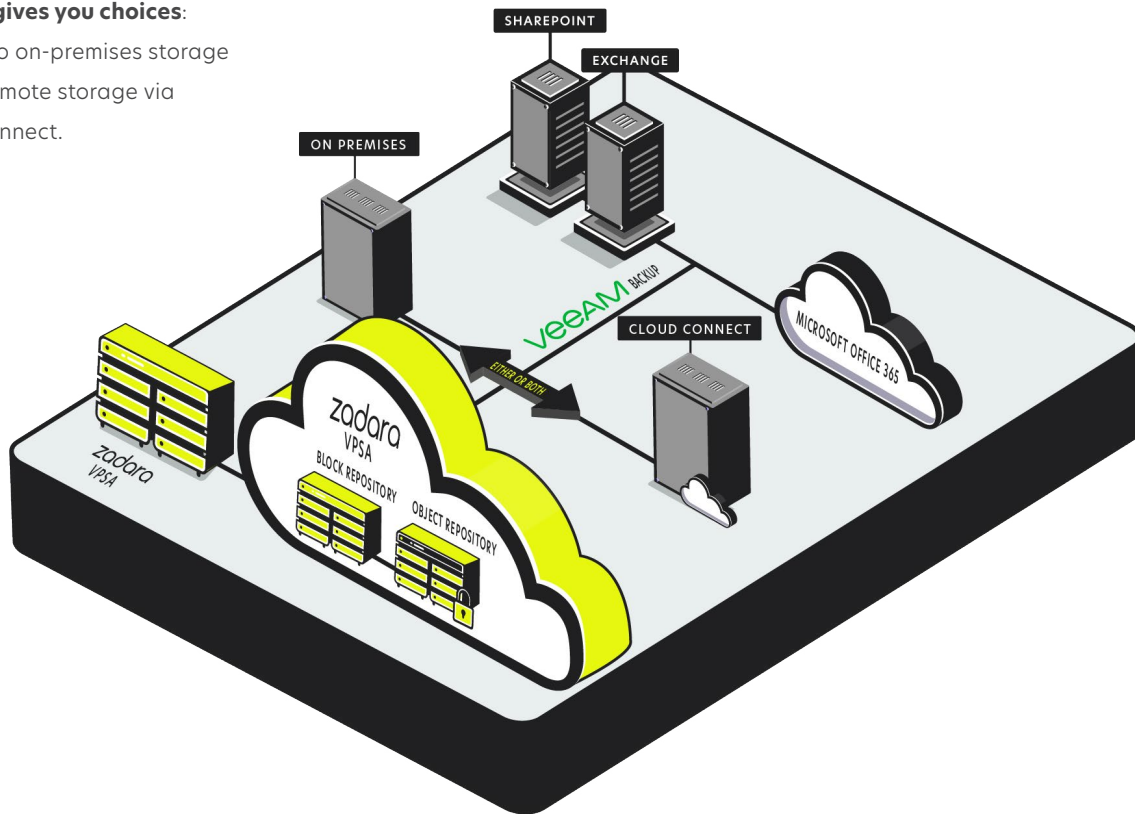

- Single storage system for all Microsoft 365 backup data in the cloud, on premises
- Seamless integration with Veeam for reliable backup

SCALABLE

- 100%-OpEx; scale up, down, and out as needed
- Optimize cost and performance with multiple tiers of storage

Zadara gives you choices:

back up to on-premises storage
and to remote storage via
Cloud Connect.

100%-OPEX, MULTI-TIER STORAGE FOR VEEAM BACKUPS

Veeam gives you the ability to store backup data in a variety of locations. The public clouds, with their breadth of storage options and pay-as-you-go model, might appear to be a convenient option. But there are significant trade offs, including loss of control over your data.

Alternatively, you might choose to build your backup solution on top of legacy storage. But you will be faced with significant equipment costs and the complexity of managing multiple storage systems, volumes and Microsoft 365 Backup installations.

With Zadara storage you can provide true 3-2-1 off-site, off cloud data protection in a 100%-OpEx solution – giving you the flexibility to scale up, down, and out as needed, while paying only for the resources

you use. Zadara allows you to deliver a backup storage solution that fulfills on the potential of Veeam's powerful backup and recovery software, with features such as:

- A single backup & recovery system for Microsoft 365, Exchange, OneDrive, SharePoint, OneDrive for Business and Microsoft Teams data
- Consolidate data backups from cloud and on-premises systems
- Adhere to stringent data retention requirements, and government regulations
- Set granular recovery options
- Erasure code protection for up to 14 9s of data durability

MANAGE HYBRID ENVIRONMENTS

Because Microsoft 365 email and SharePoint data often reside in multiple locations, you need a backup solution that can cover both Microsoft 365 and any on-premises Exchange and SharePoint instances. Using Zadara + Veeam you can protect hybrid email and SharePoint deployments, and migrate mailbox data between on-premises Exchange and Microsoft 365. Implement a 100%-OpEx on-premises backup solution, and use Veeam Backup and Recovery with Veeam® Cloud Connect or Veeam Service Provider Console with a service provider's Zadara cloud repository.

WHY SERVICE PROVIDERS WIN WITH ZADARA

Zadara + Veeam empowers service providers to deliver Microsoft 365 backup services in a 100%-OpEx model. Keep your costs tied to revenue, with built-in margins. Multi-tenant efficiency, with total resource isolation per tenant. Fully managed 24/7, so you can deploy your people to higher value tasks. Zadara systems can be installed anywhere — on your customer's premises, at your data center, and in third-party, public-cloud adjacent data centers worldwide — and managed centrally, to create a unified, 100%-OpEx data protection solution.

VEEAM FOR MICROSOFT 365 BACKUP: INDUSTRY-LEADING FUNCTIONALITY & FLEXIBILITY

Veeam® Backup for Microsoft 365 helps ensure Microsoft 365 is always protected and accessible. It gives you the power to:

- Protect Microsoft 365 data from accidental deletion, security threats and retention policy gaps
- Quickly restore individual Microsoft 365 items and files with industry-leading recovery flexibility
- Meet Microsoft 365 data security and compliance requirements
- Manage hybrid Microsoft 365 environments, including online and on premises
