

100%-OPEX, 3-2-1-1 BACKUP FOR VEEAM SERVICE PROVIDERS

Success as a Veeam Cloud & Service Provider (VCSP) means delivering security, scale, and value for your customers. The Veeam + Zadara partner solution enables you to gain a competitive edge in backup and disaster recovery.

AIR-GAPPED RANSOMWARE PROTECTION

Object Lock data immutability, air-gap architecture, and multi-tenant separation between customer backups provides highly secure 3-2-1 backup.

ELIMINATE CAPEX WITH A 100%-OPEX MODEL

You can start small, pay as you go, and scale significantly when you need to.

ADOPT KUBERNETES WITH AGILITY

It can take months on other platforms, but adding Kubernetes is easy with Zadara.

SIMPLIFY STORAGE

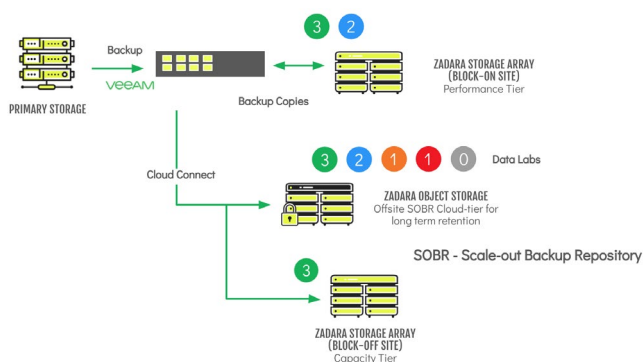

Unify primary block, file, and object backup on one platform.

SCALE MORE FLEXIBLY

Scale different environments independently, up and down as your needs change.

RECEIVE CO-MARKETING SUPPORT

Communicate your Zadara advantages to customers with go-to-market campaigns.

LEARN MORE

Talk to Zadara about how we can solve your storage problems, and why Zadara is ideal for VCSPs.
